

---

ReSharper is a powerful open-source tool that provides various ways to improve your HTML, CSS, .NET and JavaScript code. The ReSharper licence key will unlock the full functionality of this program for 30 days. After the 30 days are up you'll need to buy another licence key to continue using ReSharper. Unlike many other tools, it's affordable even for individuals without large teams or companies that need to use it. What makes this program so special? Its integration with Visual Studio has made it an indispensable part of your development workflow! Its interface is clean and intuitive, while its options provide all the customization you could ask for in a tool like this. ReSharper integrates with Visual Studio to provide you with a new inspection tool that highlights potential issues. It also allows you to do things like reformat your code, sort your properties, rename your files and classes, and navigate through projects with ease. By default, installation comes with C# support, but if you work with any other .NET language ReSharper has loads of other extensions to support it! With this ReSharper licence key installed you'll be able to enjoy almost all of its features for one month! After that time is up (and it goes by really fast!) the only thing that will be disabled will be active code analysis. After this time, you'll need to buy another licence key to continue using ReSharper! What does this licence key unlock? The full capabilities of ReSharper, including: In addition to these features, it will also enable you to use its new light font style, as well as the ability to install extensions. In fact, once you buy a license key for ReSharper you can install pretty much any of the over 200+ extensions that have been developed by the IDEs' community – and then give us your feedback on how they work! Not only that, but if a licensed developer wants a free copy of the product for his/her team they can go through our Partner Portal. We'll provide the keys free of charge. The person doing the purchasing can simply handle it for their team, and we'll provide them with the license key through email. The source code of ReSharper is available on GitHub. You can download ReSharper without a licence key here. ReSharper is not just about productivity, but also about developing quality controls in your project. With this licence you will get ReSharper Ultimate (aka Professional) which includes these features: Nowadays website design trends are moving towards responsive web design (RWD), mobile-first development, web apps and mobile apps, etc.. In this article, I will show you how to enable RWD, mobile first development and web apps in Visual Studio 2015. ReSharper Ultimate is a paid Visual Studio extension that includes a number of features that you can't directly use in normal Visual Studio. These features include: ReSharper suggestions for HTML, CSS and JavaScript code changes; Code inspection for HTML, CSS and JavaScript code; Code generation for HTML and CSS code; Auto-complete for JavaScript methods names based on TypeScript definition from NuGet packages installed during the build process; Tooltips for JavaScript elements properties or functions calls from HTML or CSS files. Visual Studio also has its own app store.
